

Acquired Brain Injury - an Information Guide is now available.

ABI Ireland's Guide to brain injury has been published to provide continuous education to both the person who has acquired a brain injury, and their surrounding loved ones.

This pocket sized guide is a point of reference that can be referred to continuously, at various stages of the rehabilitation process. No matter what the rehabilitation time or phase it will act as an accommodating indicator; introducing the professionals and their roles, while assisting the family in obtaining the necessary support they require.

While each person's brain injury is unique, with no two persons recovering at the same rate or time; the questions of concern raised by these persons and their families all share the one common ground. The ABI Information Guide provides the platform for answers.

This publication is sponsored by the National Lottery and HSE. We also appreciate contributions donated in memory of Dr. Esther Bradley.

A donation of €5 (plus postage) towards the cost of reprinting the guide is appreciated.

To order your guide - send an email to the National office info@abiireland.ie or phone 01 280 4164
